

University High School is utilizing an innovative program for our student-athletes that will assist our school nurses, Kristen Szewczyk and Mary Toledo-Trevino, and the athletic trainer in evaluating and treating traumatic brain injuries (e.g., concussion). To help these trained healthcare professionals to better manage concussions sustained by our athletes, we have acquired a software tool called ImPACT® (Immediate Post-Concussion Assessment and Cognitive Testing). ImPACT® is a computerized exam used in many professional, collegiate, and high school sports programs across the country. If an athlete is believed to have suffered a head injury during practice or competition, ImPACT® is a tool that can be used by a trained healthcare professional to evaluate the severity of the head injury and the athlete's recovery from that injury.

Ideally, the computerized exam is given to athletes before beginning contact sport practice or competition. This simple, non-invasive test is set up in a video-game type format and takes about 20 minutes to complete. It tracks information such as memory, reaction time, speed, and concentration. In addition, to help healthcare providers better understand the athlete's particular healthcare situation, there also are questions about the athlete's health history as well as current symptoms that he or she may be experiencing. ImPACT® is not an IQ test.

If a concussion is suspected, the athlete will be required to re-take the test. The athlete's performance on the post-injury test will be compared to his or her performance on the baseline and any differences in performance will be evaluated by a trained healthcare provider. The test data will enable trained healthcare professionals to determine when return-to-activity is appropriate and safe for the injured child.

The Laboratory Schools wish to stress that the ImPACT® testing procedures are non-invasive and pose no known risks to your student-athlete. We are excited to implement this program because it provides us the best available information for managing concussions. Please electronically complete the form in SchoolDoc with the appropriate signatures by August 1.

CONSENT FOR BASELINE COGNITIVE TESTING AND RELEASE OF INFORMATION

I give my permission for _____, born _____, to have a base line ImPACT® (Immediate Post-Concussion Assessment and Cognitive Testing) test administered at The Laboratory Schools. I understand that my child may need to be tested more than once, depending upon the results of the test. I understand there is no charge for testing.

The Laboratory Schools may release the ImPACT® test results to my child's primary care physician, neurologist, other treating physician, or any licensed healthcare professional as indicated below.

I understand that general information about the test data may be provided to my child's guidance counselor and teachers, for the purposes of provided temporary academic modifications, if necessary.

Signature of parent/guardian _____
